# Project

- Customer: Animal Transport company
- Create transportation routes
- Changes status of orders

# The used Communications and Development Tools

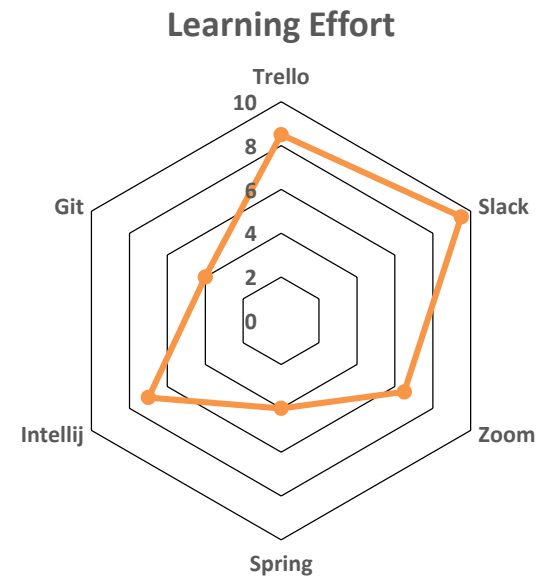

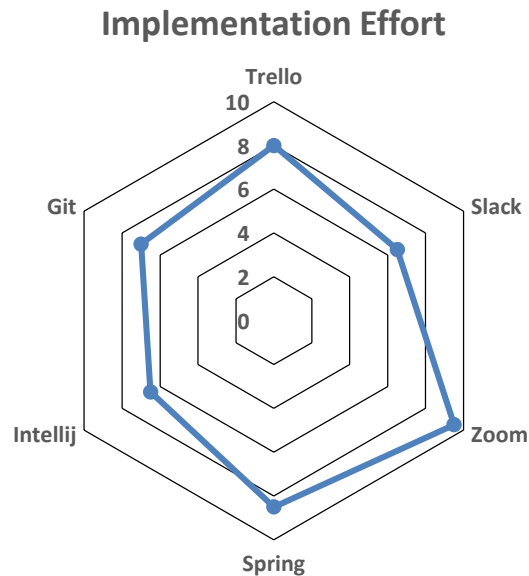

## Communication Tools

- Slack
- Trello
- Zoom

## Development Tools

- STS/IntelliJ
- Spring
- Github

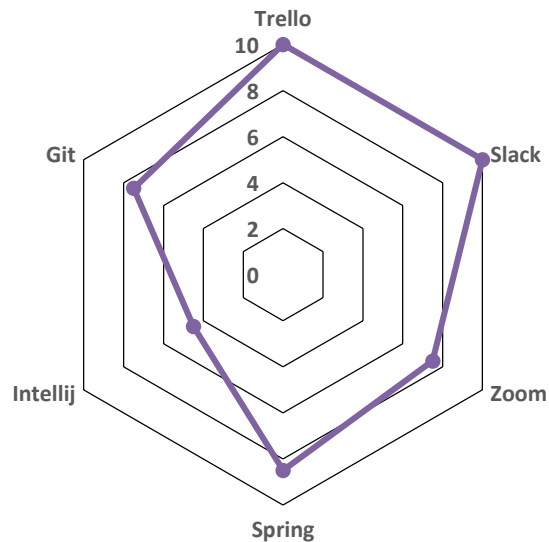

# Implementation- and Learning Effort of Communications and Development Tools

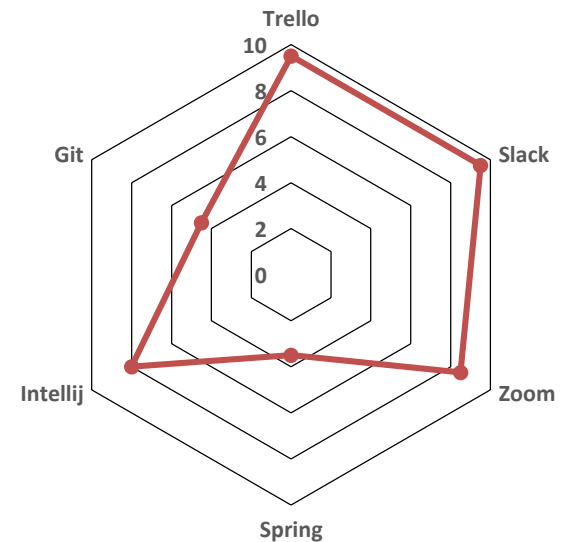

0 = high effort      10 = low effort

# Impact for Project Success and User friendliness of Communications and Development Tools

Impact for Project Success

User friendly

0 = low

10 = high

# Live show

# Positive

- Trello: good tool to manage tasks
- Slack: good communication tool to separate private/work
- Zoom: good for screen-sharing and meetings
- 24/7 IT-Support by TA Mathias Fuchs
- Change requests were manageable

# Negative

- Beginning: Was not working for everyone
- Git branching knowledge was missing
- Automatic testing was difficult
- Planning guides from lectures not usable to full potential
- Mobile responsiveness too late

# Conclusion

- Teamwork was good
- Practical knowledge combined with theory
- It was difficult to find meeting times with the whole team
